

MyFleetistics

Services Administration

Toggle the service on or off on the left side. Billing will start automatically after the trial period expires at the rate listed. You can end these services at any time, without penalty, at the start of the following month. Refunds are not issued for partial months service.

How Services Work (click to expand)

Most services come with a 30-day free trial. Once the service is enabled the free trial automatically begins. The set up fee if applicable, and monthly service will automatically begin billing after the trial ends unless you switch the service off below. The service is billed monthly unless otherwise stated. If you wish to cancel do so before the start of the next monthly billing cycle. Annual services are billed onetime and are not refundable. One free trial is available per account, per service. Beta services are offered for free until all testing is complete. Contact your account manager if another trial is needed.
