

Application

Who is eligible to use Extendable Services?

Telematics services can only be extended between **active** databases in the Fleet Management Application. To view extended telematics data, users must have an **account** in the Fleet Management Application. To view the extended services, users must have the **View device share** clearance. To accept/reject requests for extended services, users must have the **Administer device share** clearance. By default, Administrators have the **Administer device share** and **View device share** clearances.
