

# **Fleetistics Wex Fuel Card**

## **Using Fleetistics Fuel Card at the pump**

Insert card, driver is prompted to input driver ID number specific to each card & odometer reading. Accurate ODO is important to getting accurate reports.

Fleetistics is able to connect fuel and vehicle data when a fuel card is used for a single vehicle as identified in your MyFleetistics account. If a card is moved from vehicle to vehicle the data will not be accurate.

To associate the fuel card to a vehicle navigate to MyFleetistics>Account>Devices and click the edit icon on the right.
