Last update: 2024-04-18 09:44

OBD ports are generally located on the driver's side under the dash. Each make and model has a different location. The website [CarMD](https://www.carmd.com/wp/locating-the-obd-2-port-or-dlc-locator/) offers a tool to assist in port location for most makes and model. This tool can be accessed at <https://www.carmd.com/wp/locating-the-obd-2-port-or-dlc-locator/>.

OBD port in 2011 F-150
