ELD, DVIR, IFTA

What is the retention period for driver logs?

There is a purging feature that can be defined by the user on how far you want to go back and the purging frequency currently in beta.

The FMCSA requires that **six months** of driver logs and three months of DVIR data must be available for audit.

To access this feature in MyGeotab, follow these steps:
1. Navigate to Administration > System > System Settings
2. Select the Purge tab a. Note: if you do not see this tab, be sure that the Feature Preview setting is turned on in your user profile.
3. Switch "Routinely purge older data" to ON and adjust settings.
