## Changing device names

How you change a device name depends on the GPS system you are using. Some functions are limited to users with the admin or supervisor access rights in MyGeotab so be sure to check your rights with your account administrator.

To change Geotab device names launch MyGeotab and navigate to Vehicles. Select your vehicle and change the Description field. Don't forget to checkout the Driver feedback menu to coach your drivers to be safer drivers.

Changes in the MyFleetistics device editor section will not change the device names in MyGeotab. This integration has not been completed so copy and paste the name if you want the two to match.

Fleetistics

The screenshot shows the MyGeotab interface for editing a vehicle. The top navigation bar includes a back arrow, a 'Groups filter' dropdown set to 'All', and the MyGeotab logo. Below the navigation bar are several action buttons: 'Save', 'Remove', 'Cancel', 'View on map', '+ More details', and 'Privacy Mode'. The main heading is 'Vehicle Edit LR - Mini' with a help icon. Below the heading are tabs for 'Device', 'Driver feedback', 'Groups', and 'Service plan'. The 'DEVICE INFO' section contains two fields: 'Description' with the value 'LR - Mini' and 'Device type' with the value 'Version 7'. On the left side, there is a sidebar menu with icons and labels for 'Getting Started & Help', 'Dashboard', 'Map', 'Vehicles', 'Activity', and 'PaperDoDo'.
