

Application

Changing device names

How you change a device name depends on the GPS system you are using. Some functions are limited to users with the admin or supervisor access rights in MyGeotab so be sure to check your rights with your account administrator.

To change Geotab device names launch MyGeotab and navigate to Vehicles. Select your vehicle and change the Description field. Don't forget to checkout the Driver feedback menu to coach your drivers to be safer drivers.

Changes in the MyFleetistics device editor section will not change the device names in MyGeotab. This integration has not been completed so copy and paste the name if you want the two to match.

The screenshot displays the MyGeotab 'Asset Edit' page for a vehicle with ID '001 - EI - F-250(G09)'. The interface includes a top navigation bar with buttons for 'Save', 'Remove', 'Cancel', 'View on map', '+ More details', and 'Personal Mode'. A sidebar on the left provides navigation options such as 'Getting Started & Help', 'Dashboard & Analytics', 'Analytics Lab', 'Map', 'Vehicles & Assets', 'Activity', 'VideoProtects', 'Drivewyze', 'Engine & Maintenance', 'Zones & Messages', 'Rules & Groups', 'Administration', and 'Marketplace'. The main content area is titled 'Asset Edit 001 - EI - F-250(G09)' and includes a 'Show Help' button. Below the title, there are tabs for 'Asset', 'Driver feedback', 'Groups', 'Rate plan', and 'Extended services'. The 'Asset' tab is active, showing 'ASSET INFORMATION' with the following fields: 'Description' (001 - EI - F-250(G09)), 'Device type' (Version 9), 'Current driver' (Eron Iler (eron.iler@fleetistics.com)), 'Serial number' (G9B020F9FC95), 'Vehicle ID number' (1FT7W2BT1FEC44042), 'License plate' (BUY-4YOU), 'Odometer' (117838 mi), 'Current engine hours' (43 hours 54 minutes), 'Comments' (Purchased new), and 'State/province' (Florida). A blue button labeled 'Current Status and Installation Info' is also visible.
