

## Application

# How do I share [Geotab] real time fleet data with my team so they can see it on iPhones and Desktop computers?

To view realtime data on an iPhone or Android users need to have the Geotab Drive App. The app is free and can be downloaded from the app store. To access the system they will need a username and password. Your System Administrator will need to request user credentials for the level of access required from your Account Manager or our Support Team.

For more information on Geotab mobile apps go to:
