

Application

Update posted road speed on Geotab

If an error is found on the Geotab map for posted road speed, a correction can be submitted. The correction will be immediately added to the OpenStreetMap map and then to Google about 60 days later.

1. Click on Map
2. Type in the street name in the search field.
3. Click on the street and click "Updated posted Road speed"
4. Type in the road speed and hit Apply change.
