

Application

How do I remove a device from Extendable services?

! IMPORTANT: You can remove a device from the target database after accepting a request from an primary database to extend services. However, removing a device does not remove billing for the subscription. To deactivate billing, service must be terminated. To terminate an extended service, please contact Fleetistics.

1. To remove a device from a target database, return to the **Vehicle Edit** page, and

under the **Device** tab, click the **Remove** button.

2 Review the messages in the **Remove device** dialog, and when finished, click the **Delete** button.
